

Three-dimensional remodelling of the body.

INNOVATIVE MACHINE
FOR BODY TONING

05

biotec italia

MyTone

biotec italia
Aesthetics

Electromagnetic energy which induces muscle contractions otherwise not repeatable with voluntary movements.

VARIPULSE MODE PREVENTS THE PHENOMENON OF THE MUSCULAR CONTRACTILE STIMULUS BECOMING HABITUAL.

Possibility to treat up to four different areas during the same session.

Short treatment times.

Immediate resumption of normal daily activities.

Comfort and safety during treatment.

VARIPULSE technology.

Simultaneous toning and fat reduction of the treated area.

ACE, cooling of the applicators by means of fluid.

UNIQUE TECHNOLOGICAL INNOVATIONS

Biotec Italia platforms introduce a new concept based on the latest hardware and software design. Our research and development team develops next generation hardware solutions for the high-tech and high-performance medical industries, allowing constant system update to eliminate the problem of technology obsolescence. Maximum power and performance, always guaranteed.

Fit4[®] technology: incomparable treatment speed.

MYTONE includes Fit4[®] technology that enables to treat up to 4 body areas simultaneously, reducing the number of sessions.

VARIPULSE[®]

Automatic variation of the electromagnetic pulse. Each individual programme emits pulses with different signals, frequencies and stimulation parameters. The muscle thus undergoes different phases of contractile stimulation, producing maximum muscle engagement, and avoiding familiarisation with the electromagnetic stimulus.

ERGONOMIC AND VERSATILE APPLICATOR

You can choose from 2 handpiece sizes to suit tissues of different consistencies and positions on the body. The ergonomics of the handpiece, made of pure ABS material, guarantees optimal coupling with the skin and a high level of thermal insulation.

ACE: TEMPERATURE MONITORING IN THE HANDPIECE

MYTONE applicators, with their structure and shape, are carefully designed to guarantee maximum efficiency, enabling the creation of a homogeneous field throughout their cross-section. They also have the advantage of being cooled by the fluid that flows inside them, guaranteeing longevity and efficiency of the technology.

SIMPLE AND INTUITIVE OPERATION

MYTONE is equipped with a colour touchscreen with a wide viewing angle that makes it easy to use the device. The information on the screen guides the user, step by step, through the entire treatment. The parameters can be easily set via the touchscreen.

Ergonomics, Design, Reliability.

LIGHT AND MANAGEABLE

Convenient grip of the applicator permits rapid positioning and securing to the area to be treated.

MODULATED ELECTRICAL PULSES

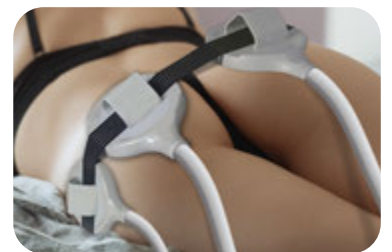

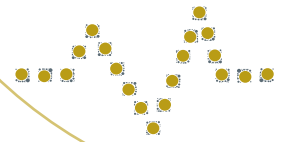

High heat exchange capacity due to the ergonomics of the applicator.

PRECISION AND SAFETY

MYTONE applicators, with their carefully studied structure and shape, enable the creation of a homogeneous field throughout their cross-section.

FOCUSED MAGNETIC FIELDS

The focused electromagnetic field polarizes and depolarizes the muscle concerned, creating a contractile stimulus in 100% of the muscle mass, significantly more than is possible with conventional exercise workouts.

MYTONE

The most effective solution to treat several areas at once.

Maximum comfort and satisfaction.

SAFETY

Reliability and safety during the treatment procedure thanks to high technological standards and innovative treatment protocols.

NO DOWNTIME

Resumption of normal daily activities immediately after the treatment.

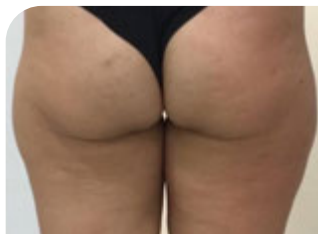

NO PAIN

Guaranteed comfort during treatment, thanks to handpieces ergonomics.

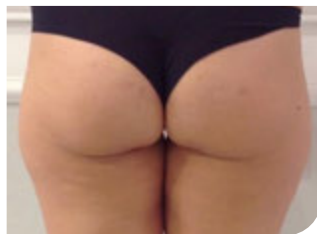

“I have achieved great results, now I feel even more beautiful.”

Clinically tested results.

Before

60 days later / after 2 sessions

Treatment indications.

-  DETOX
-  ANTI-CELLULITE
-  RELAXATION
-  LIPOLYSIS
-  PHYSICAL REHABILITATION AND WELLNESS
-  MICRO-CURRENTS FOR FACE AND BODY
-  MUSCLE TONING
-  TONING OF ABDOMEN, ARMS, BUTTOCKS AND THIGHS
-  POST-PREGNANCY MUSCLE TONING
-  LYMPHATIC DRAINAGE
-  INCREASED COLLAGEN PRODUCTION ACTIVITY

biotec italia

MyTone

MYTONE reduces fat accumulations by activating the large muscle groups that help to tone and slim.

Excellent results on abdomen, arms, buttocks and thighs.

Effective for slimming and weight loss.

Innovative and exclusive design that facilitates its use.

Absolutely unique treatment protocols.

Targeted treatment programmes.

The design of the machine may slightly differ from the image, while keeping the described functions unchanged.

biotec italia

MyTone

Technical Characteristics

MAXIMUM POWER SUPPLY VOLTAGE	240 VAC - 50/60Hz
MAXIMUM POWER	1500V
FUSES	2 X F4 250V
SAFETY CLASS AND TYPE OF APPLIED PART	I BF
DIMENSIONS [L X P X A]	450x500x420mm
WEIGHT	42Kg

MAGNETIC FIELD

MAXIMUM POWER DENSITY OF MEDIUM APPLICATOR	0.5 - 1.8 T
MAXIMUM POWER DENSITY OF LARGE APPLICATOR	0.7 - 2.5 T
PULSE DURATION	280 µs

A SOLID COMPANY

Since 1993, Biotec Italia combines a strong technological know-how with a strong scientific vocation and a natural predisposition for the generation of aesthetic well-being. Designing, manufacturing and marketing technological devices for the aesthetic medical sector and products related to high-profile cosmetics, all this is a real mission for Biotec Italia. Based in Dueville (VI) and in London, Biotec italia is one of the main players in the sector.

100% MADE IN ITALY

The entire production process, from design to assembly and quality testing, is absolutely Italian. To the warranty of technological excellence, Biotec combines the punctuality and competence of its after-sales service, the professionalism of the Biotec Italia Academy specialists, leaders the scientific field, and the irrefutable effectiveness of the sales and marketing training given to Biotec clients.

FROM PROJECT TO REALISATION

From conception to design, up to production and after-sales. A brilliant R&D department, an innovative anecoical testing chamber and efficient production and logistics facilities are essential for developing the heart of the activity: research, innovation and application, all managed and controlled by the group in the Italian headquarters in Dueville (VI).

CERTIFICATIONS AND GUARANTEES

Biotec Italia has achieved double certification recognition: both the authoritative ISO 9001, to guarantee the company's absolute compliance with the strict regulations in force in Italy, and the "CE" marking to confirm the technological efficiency of its machinery.
